

K2 PEST CONTROL

Full Website Audit & Technical / SEO / Content Status Report

Target Domain: <https://www.k2pc.ca>
Stack: Next.js 15+ / React 19 / MySQL / Prisma
Audit Date: August 2026
Version: 1.0 (Production Readiness Audit)

⚠️ CRITICAL CONTENT NOTICE: CONTENT WRITING IS NOT COMPLETE

While the website's technical architecture, SEO schema engine, database fallback, and UI modules are fully functional, **the content writing across the site remains incomplete**. The site currently uses placeholder phone numbers, dummy Saskatchewan map coordinates, generic test blogs, and stock customer testimonials that must be replaced before full-scale commercial advertising.

TECHNICAL CORE

88%

App Router, APIs, Auth, Fallback

GENERAL SEO

90%

Sitemap, Robots, Schema, Tags

LOCAL SEO

70%

GTA Geo Tags, Schema (Needs Fixes)

CONTENT WRITING

35%

⚠️ Incomplete / Placeholders

1. Executive Summary & Objective

This report provides a comprehensive evaluation of the **K2 Pest Control (k2pc.ca)** web platform. It details current implementation milestones, identifying what is successfully completed, what is pending, and critical gaps across **Technical Architecture, Technical & On-Page SEO, Content Readiness, and Local SEO (Greater Toronto Area)**.

2. Technical View: What's Done vs. What's Remaining

✔️ Completed Technical Modules

MODULE	IMPLEMENTATION DETAILS	STATUS
Core Framework	Next.js 15+ App Router, React 19, TypeScript, Tailwind CSS, Turbopack support. Fast SSR & SSG routing.	COMPLETED
Database & Hybrid Fallback	Prisma ORM with MySQL connection and graceful in-memory file fallback (content-db.ts) ensuring 100% uptime if MySQL is disconnected.	COMPLETED
Lead Intake & Security	Interactive multi-step contact form with Zod schema validation, XSS sanitization, anti-bot honeypot, and IP rate-limiting.	COMPLETED
Email Dispatch System	Automated dual email dispatch (Admin instant alert + Customer branded auto-responder) using Resend / SMTP.	COMPLETED
Admin Dashboard	JWT/Session protected admin portal for managing customer leads, dynamic service catalog, blog articles, and business metadata.	COMPLETED
AI Chatbot Assistant	Interactive customer assistant (/api/chat) with prompt customization, pre-set FAQs, and toggleable availability.	COMPLETED
Typography & Performance	Zero layout-shift (CLS) via next/font (Space Grotesk, Inter, IBM Plex Mono) with preconnect resource hints.	COMPLETED

🕒 Remaining Technical Items

TASK	DESCRIPTION / RECOMMENDATION	PRIORITY
SMS Lead Dispatch	Integrate Twilio or AWS SNS webhook to text on-call GTA technicians immediately upon urgent 2-hour emergency submissions.	HIGH
Asset Host Migration	Convert and host pest catalog images locally in modern WebP/AVIF rather than relying on external Unsplash URLs.	MEDIUM
Security Headers & CSP	Configure strict Content Security Policy, HSTS, and X-Frame-Options headers in <code>next.config.ts</code> .	MEDIUM
Automated E2E Testing	Add Playwright test suite for lead submission verification, dynamic service routing, and admin authentication.	LOW

3. General & Technical SEO: What's Done vs. What's Remaining

✔ Completed SEO Modules

SEO FEATURE	IMPLEMENTATION DETAILS	STATUS
Dynamic XML Sitemap	/sitemap.xml dynamically includes all static pages, active service slugs, and published blog posts with accurate priority weighting.	COMPLETED
Robots Directives	/robots.txt allows search engines to index public content while disallowing admin routes and API backends.	COMPLETED
PestControlService Schema	JSON-LD structured data in root layout with license numbers, hours, openingHoursSpecification, pricing, and payment methods.	COMPLETED
Service & Breadcrumb Schema	Individual service detail pages embed dedicated Service and BreadcrumbList JSON-LD schemas.	COMPLETED
FAQPage Schema	Rich Snippet eligible FAQ structured data embedded on homepage and service pages for Google snippet expansions.	COMPLETED
Meta & OpenGraph	Dynamic title templates, canonical tags, and OpenGraph/Twitter summary cards configured per page.	COMPLETED
Analytics & Webmaster	Google Search Console verification token and Google Analytics GA4 (G-8EHS2WM33H) script integrated.	COMPLETED

⌚ Remaining SEO Optimizations

- **Blog Article Schema:** Add BlogPosting JSON-LD schema with author, datePublished, and dateModified to blog post pages.
- **Internal Link Matrix:** Create contextual links between related service pages (e.g., cross-linking "Rodent Control" and "Commercial IPM").
- **301 Permanent Redirects:** Add server-level permanent redirects in next.config.ts from alias routes (/privacy-policy → /privacy, /terms-of-service → /terms).
- **Image Alt Text Audit:** Validate that all user-uploaded CMS service graphics include localized alt text (e.g., "Bed bug thermal heat extermination in Toronto").

4. Content Writing Status: ⚠ INCOMPLETE (Gap Analysis)

Content Writing Assessment: The site cannot launch effectively for organic rankings or paid ad campaigns until placeholder copy, sample blogs, and dummy business records are replaced with verified, authoritative content.

AREA	CURRENT STATE	MISSING CONTENT & REQUIRED WORK
Business NAP Details	PLACEHOLDER	Phone number is currently dummy (416) 555-0199; map embed coordinates point to Saskatoon instead of Toronto. Must provide official phone & headquarters address.
8 Core Service Pages	PARTIAL DRAFT	Contains short descriptions and generic treatment steps. Needs comprehensive Ontario-specific preparation checklists for clients, chemical/heat safety protocols, and explicit warranty terms.

AREA	CURRENT STATE	MISSING CONTENT & REQUIRED WORK
Blog & Resource Library	ONLY 3 SAMPLES	Only 3 sample posts exist. Needs 10–15 localized SEO pillar articles targeting GTA search queries (e.g., "Tenant bed bug rights in Ontario", "How to get rid of carpenter ants in North York").
About Us Page	TEMPLATE COPY	Uses placeholder team bios and stock avatars. Needs authentic company origin story, licensed exterminator profiles, and verified ministry credentials.
Commercial Services	GENERAL OVERVIEW	Needs dedicated industry breakdowns: Restaurant & Food Service Health Audits (DineSafe), Warehousing & Logistics, Multi-Unit Residential Property Management.
Social Proof & Reviews	MOCK REVIEWS	5 hardcoded placeholder reviews. Must be replaced with real, verified Google / Homestars reviews referencing specific GTA municipalities.

5. Local SEO (GTA) Analysis: Integrated vs. Missing

Local SEO Objective: Dominating high-intent local search queries across Toronto, Peel, York, and Halton regions (e.g., "emergency exterminator Toronto", "wasp nest removal Mississauga", "bed bug heat treatment GTA").

What is Currently Integrated in the Site

INTEGRATED FEATURE	CURRENT IMPLEMENTATION DETAILS
Ontario Geo Meta Headers	Layout includes geo.region: "CA-ON", geo.placename: "Toronto", geo.position: "43.7142; -79.3364", and ICBM tags.
GTA Regional Scope	Defined coverage for 11 GTA municipalities: Toronto, North York, Etobicoke, Scarborough, Mississauga, Brampton, Vaughan, Markham, Oakville, Richmond Hill, Burlington.
Local Service Area Badges	ServiceAreaClient.tsx showcases region-specific response commitments (e.g., "2h Emergency Dispatch", "Local Unit on Standby").
PestControlService Schema	Embeds complete Toronto PostalAddress (M3C 1H9), Ontario Applicator License (ON-849201-P), and local opening hours.
Interactive Map Module	LocationMapWidget.tsx renders interactive Google Map directions link and neighborhood coverage selectors.
Direct Phone Call CTAs	Mobile sticky header and emergency action banners configured with immediate tel: dialing protocols.

What is Missing / Needs Improvement for Local SEO

MISSING ITEM	IMPACT & NECESSARY CORRECTION	PRIORITY
Correct NAP & Map Embed	Critical Bug: Current embed coordinates in company.ts point to Saskatoon (-106.6834, 52.1504). Must be updated with exact Toronto Google Maps Place ID and real phone number.	IMMEDIATE
Dedicated City Landing Pages	All location links currently anchor to the homepage widget. To rank across Peel, York, and Halton, create dedicated landing pages: /locations/mississauga, /locations/brampton, /locations/north-york.	HIGH
Local Citation Links (sameAs)	sameAs schema currently lacks links to authoritative Canadian directories: Google Business Profile, Homestars, BBB, YellowPages.ca, and TrustedPros.	HIGH
GeoShape Multi-Polygon Schema	Schema only has 1 coordinate point. Needs GeoCircle or multi-region ServiceArea polygons covering the 60km Greater Toronto service radius.	MEDIUM
Municipal Bylaw Content	Lack of city-specific FAQs regarding municipal property standards (e.g., Toronto Municipal Code Chapter 629 on pest control, Peel Region rodent control).	MEDIUM
Live Google Reviews Integration	AggregateRating in schema is hardcoded (480 reviews). Needs Google Place API integration or a direct link to the Google Review submission form.	MEDIUM

6. Actionable Implementation Roadmap

PHASE	CORE DELIVERABLES	TARGET TIMELINE
Phase 1: Critical Fixes	• Fix Google Maps embed coordinates & verified business phone. • Add 301 redirects for legal route aliases. • Connect official Google Business Profile and social directory links.	Days 1 – 3
Phase 2: Content Writing	• Write full copy for 8 service pages with prep guides & FAQs. • Publish 10 localized GTA blog articles. • Draft authentic About Us and Commercial sector pages.	Week 1 – 2
Phase 3: Local Expansion	• Build dedicated City Landing Pages (Mississauga, Brampton, etc.). • Expand GeoShape polygon schema & embed Google Places review badge. • Integrate SMS lead notification for on-call technicians.	Week 3 – 4
